List other important issues raised by the people on the back of this sheet. Try to be specific and identify solutions. For instance identify the location and conditions of other nearby villages. If possible, sketch a simple map on the map of the sheet showing the area, nearby villages, departure routes and other key issues.

IMPORTANT: 1) Leave no field blank. 2) Put 'n/a' if no data are available. 2) Do not use '0' to signify no data, use only to signify a value of zero. 3) Except where specified, use number of people instead of families and use an average family size of 7 if calculation required.
