L. Market monitoring form

A. General information

A.1 Market name and location

A.2 Date of the data collection

A.3 Name of the assessors

1.

2.

B. Price of key items

B.1 What were the prices of the below key items in \textit{date-before the project start date}?

\textit{Put answers in Table 1 below}

B.2 What are the prices today?

\textit{Put answers in Table 1 below}

Table 1: Prices of key items

<table>
<thead>
<tr>
<th>Item</th>
<th>Unit (i.e. box, piece, kg)</th>
<th>Price before the project start date(^1)</th>
<th>Price today</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

B.3 In case of price variation, what can explain it? \textit{(NB: if the answer is “shortage of goods” try to understand the underlying cause of this shortage and tick the appropriate box)}

\[
\square \quad \text{Seasonality} \\
\square \quad \text{Cash transfer from CARE project} \\
\square \quad \text{Cash transfer from another project} \\
\square \quad \text{Other, specify}
\]

B.4 Compared to \textit{date-before the project start date}, are there as many traders selling those key items on the market?

\[
\square \quad \text{Yes, more traders} \\
\square \quad \text{Yes, same number of traders} \\
\square \quad \text{No, less traders}
\]

In case of variations, what can explain the change in the number of traders?

B.5 Compared to \textit{date-before the project start date}, are there as many key items being sold in the market?

\[
\square \quad \text{Yes, more items} \\
\square \quad \text{Yes, same number of items}
\]

\(^1\) You may not want to collect this data at this stage as you should already have it as part of your initial market analysis. It may however be good to provide it to enumerators (i.e. pre-filled the questionnaire) so they have a basis for comparison
In case of variations, what can explain the change in the number of items in the market?

B.6 Compared to *date-before the project start date*, is the quality of the key items being sold at least the same?
- Yes, better quality
- Yes, same quality
- No, lower quality

In case of variations, what can explain the change in quality?

**C. Knowledge of the project**

**C.1.** Do the traders on the market selling key targeted items know about the CARE project?

<table>
<thead>
<tr>
<th>Trader 1</th>
<th>Trader 2</th>
<th>Trader 3</th>
<th>Trader 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>No</td>
<td>Yes</td>
<td>No</td>
</tr>
</tbody>
</table>

**C.2.** If yes, did the project have an impact on their business?

<table>
<thead>
<tr>
<th>Trader 1</th>
<th>Trader 2</th>
<th>Trader 3</th>
<th>Trader 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>No</td>
<td>Yes</td>
<td>No</td>
</tr>
</tbody>
</table>

What impact?

Any other observations made at the market place:
