- Adobe Content-Aware Fill : an automatic tool for fill and blend modes, which works on most photo editing applications in addition to Adobe Photoshop. It analyzes the content around the object and can be used to fill in any object that is tightly surrounded by appropriate content. This greatly speeds up the time-consuming process of filling in objects using only manual techniques, as well as can be used as different blend modes depending on the level of accuracy required. - Adobe Smart Sharpen : defines a new sharpening technique incorporated into Photoshop's main sharper setting to provide consistently better results for photographers. Even with the main sharpening option turned on, and using the appropriate amount of manually sharpening, the Smart Sharpen setting in Photoshop combines the best aspects of both conventional sharpening methods to produce the best possible results. - Adobe Color Edge : an intelligent tool that enhances the appearance of edges in your images. Adobe Color Edge intelligently smoothes and enhances edges, making them look perfect every time. As well, the Color Edge feature enables you to rapidly edit and enhance edges in any color by simply creating a new gradient, or editing an existing gradient, and then quickly applying the result to the edge. - Natural Viewfinder for Retouching : Adobe Photoshop Elements 2019 and Access 2020 users are now able to view and use Elements' Natural Viewfinder feature for retouching on the desktop or mobile device using the Natural Viewfinder app. Natural Viewfinder uses AI to intelligently find the best retouching tools for your photo, whether you're making corrections to skin tones, changing the look of eyes, removing blemishes, or adding detail to hair.
