World Weather Gadget Crack + Free Download [April-2022]

World Weather Gadget is a desktop gadget that comprises useful and powerful features for checking out weather details on a selected location. The interface is made from a small frame that can be moved anywhere on the screen. Plus, you can make it stay on top of other windows, thus allowing you to quickly get a glimpse on the weather situation even while working in other software tools. From the Options panel available through the context menu, you can pick the temperature unit and city. The app shows the temperature for the current and following three days. Plus, you can hover the mouse cursor over the frame to get additional details concerning the lowest and highest temperature for the current day, along with the sunrise and sunset time. Moreover, you can refresh data and access Orange UK Weather pages online for an in-depth weather report. The widget has a minimal impact on system performance, running on a low amount of CPU and RAM. It has a good response time and shows accurate weather details. No error dialogs have been shown in our tests, and the app did not hang or crash; we haven't come across any issues. All in all, World Weather Gadget should please the entire audience.
