DjVu To TIFF Converter is a DjVu to TIFF conversion application which is available for Windows operating systems. It is fast and reliable DjVu to TIFF conversion application that can be used to convert DjVu document to TIFF or DjVu image to TIFF document with a few simple clicks. ... View more

A: I was able to find that the Image Resizer has TIFF support.

Q: Running Emacs in Emacs for Mac I am using the emacs(QGIS) for Mac and want to try Emacs. I found a package that can get

elisp into emacs: After a while of copy pasting commands, I figured out how to get it to work: 1) Go to /Library/Emacs/site-lisp/elisp/ 2) Open up my.el and copy the "eval-buffer" at the top of the file 3) Restart emacs 4) You should see the menu items for emacs(including the Elisp menu). However, when I try to run Elisp, it doesn't work:

```
(load "~/.emacs/my.el")
(eval-buffer) Type of
operation: write-file File to
write to: *temp-buffer* (I'm
also a noob, and I don't know
what the command to evaluate
the buffer is.) Can anyone
```

please help me? A: You have to create a package for your.emacs. The steps are similar to the other ones on the emacs website, but I think the command to load a package is package-initialize. I always use package.el (which is only a skeleton) to create a package and just copy that into my.emacs file. That should be about it, good luck!

Q: how to design a RESTful web service? I want to learn to design a RESTful web service, but have a hard time learning about the workflow. Can someone give me some references or examples? I am

asking this question because I have been trying to google for how to do this
