Stop will stop playback of the current audio source. Play will play the current audio source. Pause will pause playback of the current audio source. Mute

.../defaultapps/iTransfersetupscript/iTransferScript.scr -o .../defaultapps/iTransfersetupscript/iTransferScript.scr The above command will create a script file in the default apps/iTransfersetupscript folder. The script file will be named as iTransferScript.scr. If you double-click the script file, the script will be executed. This script will import the selected songs, playlists and artwork (if available) into the iPod/iPhone/iPad. With iTransferScript.scr you can do the following: 1) Import song, playlist and artwork (if available) to iPod/iPhone/iPad. The artwork will be added as Cover/Artwork if you have the artwork with you in the target folder. 2) Import song, playlist and artwork (if available) into iTunes. This will result in creating a new iTunes Library. 3) Import songs, playlists and artwork (if available) into a specific folder of your choice. The script will automatically save the songs and playlists in a subfolder called "iTunes Music". You can specify the root folder of this "iTunes Music" folder by setting a variable called iTunesRoot. To specify the root folder, append the variable value to the target folder. To import songs, playlists and artwork into iTunes, set the variable iTunesRoot to your iTunes Library. To import songs, playlists and artwork into a specific folder of your choice, set the variable iTunesRoot to the folder you wish. Please note that iTunes will create a separate iTunes Library for importing songs, playlists and artwork (if available). The new iTunes Library is empty when you run the script. The new iTunes Library can be renamed and moved to another location. Please download the script at http 2edc1e01e8
