But there is a frustration to be expressed about the new way to get feedback from customers such as yourself about your work. As much as I hate the "share" system I applauded it at the IMATS show this year. I was impressed with the ads they ran everywhere from the airplane on the way in to the on the way out. Thanks! But it is a spotty Beta and unconnected in some ways.

Here's to better communication with the experts. here is my feedback : i feel that some tools are very well implemented and the UI is [usually] clean and straightforward. But for sure, this new version is "heavy" compared to the previous versions in terms of memory usage, processing speed, etc... (i noticed it during an intensive processing with my last heavy projects)

I'm really looking forward to the CC release, i've been a customer for over a year and only the last month I started getting all this new features. I don't regret to spend my money already, but i'm waiting for your reply to be really sure that this is the right decision... In May, we launched Adobe Photoshop CS5 Review, an experimental, live forum for customers of Photoshop.

This new beta is a first step in taking the concept of Review one step further, into the actual application.

We're excited to offer the opportunity for you to share your work and get it evaluated.

Review is a new way to offer feedback from real users of your product - on their own jobs.com or vectorclass.com, for example.

Your customers will participate in a -shared', -collaborative process to review your work, using the advantages of professional and academic environments.

The users' reviewers have access to the software and can view your work, with their feedback available for you to see. In turn, you can ask reviewers to re-review the work as part of a mutually agreed process.

You can view feedback on a thumb-drive or hard drive

The reviewers' comments are posted to a place called 'Reply' on a 'Job' or 'Task' feed, or just the 'Task' feed.

And the system is fully integrated with the CS5 workflow and document templates.

7. Creative Speed. Photoshop makes it easier to create without sacrificing consistency and quality. The tools all work together seamlessly, so you can start working quickly and slow the quality when needed. This makes Photoshop perfect for getting the most from your creativity, whether you're leading a large team, working quickly or jumping back and forth between tasks. 6. Easy Use. Photoshop combines powerful digital painting tools with easy navigation controls. It takes just a few clicks to edit and save your work. There's no need for a steep learning curve. Although Photoshop has many powerful features, it's designed so you can focus on your work and not on complicated toolbars and menus. 5. Easy Sharing. Photoshop saves your files as standard Portable Network Graphics (PNG) files for sharing on the Web, Disc Drive, cell phone or other electronic devices. When you edit an image, you can save the original as a copy, and keep the edited version with Photoshop's new versions feature. Simply select the version you want, and Photoshop will make sure that you don't lose your edits. 4. Easy Going. Photoshop offers enough options to let you create just about anything you can imagine. The tools are easily accessible from the top panel, so you can use the tools as needed. You just need to click to make changes. Photoshop takes the guesswork out of editing, so you can focus on what you really want to do. 3. Grid and Anchor Tools. Photoshop's new grid and anchor tools make it easy to fine tune the image. Just pick the grid lines or align the anchor points to fit the image's new dimensions. Photoshop can then round out the edges to fit, making it easier to create precise, professional images.
